To whom it may concern,

Our De Dutch Pannekoek location has recently been treated for Anti-Slip by Tile Safe Products for both our staff and patron's safety; we had the "Safe Tile™" Anti-Slip treatment applied to our floors.

The traction has been increased considerably and cleaning has also improved. Tile Safe's Multi Kleen is also an excellent cleaner degreaser that we use and recommend.

Now our floors are very Safe & Clean, Tile Safe provides ongoing inspections, detailing the overall condition of our floor to quickly eliminate any potential problems before they occur. Taking these steps provides a safer flooring environment and potential slip-fall accidents avoided. If an accident should ever happen, we will be prepared to show that, as a business, we have taken reasonable care and precautions.

We have found since the on site training completed by Stan Schaefer, our cleaning in both the kitchen and dinning room is better and easier.

We are very satisfied with the results and would highly recommend the "Safe Tile™".
