Dear Mr. Hehenberger

In May 2003 setting up and equipping our new Battery workshop, we decided to have the Floor of the shop coated with WearMax Professional Ceramic Finish for the following reasons:

Superior Chemical Resistance (especially against spills of hot solder)

Superior Slip Resistance (Safety Hazard, caused by the high level of foot traffic)

After WearMax Professional Ceramic Finish has been installed for almost 1 year. I can simply recommend this Product for everybody. I have got excellent response from our technicians concerning the durability and chemical resistance of our floor, as well as from our maintenance and cleaning staff concerning the cleaning properties. Especially scuffmarks, a major problem in the past, are history now, because they are really easy to remove.

Sincerely  
Litronic mechatronic Systems GmbH

Szegedi Hermann
